Absorption Field Product:	Depth Of Trenches (Range in Inches):			Total Absorption Field Sq. Ft. Required:	
Issued permits expire twelve (12) months from approval date and are not valid unless signed below by authorized representative of DeKalb Public Health. No person may begin the physical development of a lot or structure where an on-site sewage management system will be utilized, nor install an on-site sewage management system or component thereof, without having first obtained from DeKalb Public Health, a construction permit for the installation of an on-site sewage management system. Any grading, filling, or other landscaping subsequent to issuance of a permit may render permit void. Failure to follow site plan may render permit void. Any grading, filling, or other landscaping subsequent to final inspection by county health department, which adversely affects the function of the on-site sewage management system, may render approval void. Installation contractor is responsible for ensuring all required setbacks are met. Issuance of a construction permit for an on-site sewage management system and subsequent approval of same by representative of DeKalb Public Health shall not be construed as a guarantee that such systems will function satisfactorily for a given period of time; furthermore, said representative(s) do not, by any action taken in effecting compliance with these rules, assume any liability for damages which are caused, or which may be caused, by the malfunction of such system.					
I hereby apply for a construction permit to install an On-Site Sewage Management System and agree that the system will be installed to conform to the requirements of the rules of the Georgia Department of Public Health, Chapter 511-3-1 and the permit. By my signature, I understand that final inspection is required and will notify DeKalb Public Health upon completion of construction and before applying final cover material to the system.
